

# Remember the High-Tech Data Management Tool for Choral & Instrumental Directors...Circa 1990?

**We had tabbed cards and file folders, and access to information was easy...**

Life was better then...carefree...not as hectic...less stress...  
No thoughts of RAM, Spam, Modems or Megabytes...  
And the only CDs we had were for making music...

Ahhhh...the good old days...

**Enter the “Decade of the Computer”** and the learning curve to master the **High-Tech Data Management Tool for Church Musicians...Circa 2000** started to rise...dramatically.

We tried to learn MS-DOS...  
we upgraded to Windows...  
ver. 1, ver. 2, ver. 3.0, ver. 3.1, Windows 95, 98, NT, ME, 2000 and then XP.

## **So what's the big deal?**

Must our lives adapt to fit the technology...  
Or should the technology adapt to fit our lives?

## **It's time for a confession...**

At Music Manager Software™, we've been trying for over a dozen years to develop the best, most comprehensive, user-friendly, feature-laden computer software programs for Church and School Choir, Band and Orchestra Directors ... We've gone through One...Two...Three...Four versions, chock full of Icons, Menus, Forms, Reports, Keyboard Commands, Shortcuts, Bells and Whistles...

But you know what?

## **Some of our customers actually had the nerve to tell us...**

“You've got a *great* program...but...can you make it any *easier* to use?”

***We did. The solution was simply a matter of taking a look back at 1990...***

**Welcome Back to the Future...**

Help Prompts: On 

***“Point & Click” has never been so easy...***

# Serving School & Church Musicians For Over a Decade...

**Music Manager Software™** has always had the reputation for providing the most comprehensive and flexible “user friendly” software, since our first versions were released in 1991. Master Music Manager™, has set the standard for Music Library and Music Office Administration Software for the past decade. Now, with our new version 5.0 Master Music Manager™, we’ve looked “backward” and taken a step “forward”, merging the ease of a tabbed card file to the technology of the 21st Century.

**With our new ☞ClikTab™ and ☞ClickButton™ features, all of these modules are just a “click” away...**

Student Membership, Music Library, Reference Audio and Video Recordings, Music Inventory, Equipment, Supplies, Instruments, Choir Robes, Drama Costumes, Band Uniforms, Personal Address Book, Accounts Module for Managing Your Budget and Fund-Raising, Word Processor, and Planning Calendar.

**Features include:** A new “Help Prompts” tutorial feature, Keyboard and Pop-up data entry, Automatic searches and reports by one field or a hundred, new “Easy Search” and “Multi-Field Search” options that take all of the “guesswork” out of searches, **Use the new “BarCode” features to print out BarCode labels and scan BarCodes for Data Entry and Searches.** The new “Reference Library” allows you to scan or type in a BarCode number and information contained in the datafile is automatically transferred to your data record. (Optional BarCode scanner, available separately, is not required for data entry.) Type in your Zip Code and the software enters your City and State. A spell checker/dictionary is built into the Word Processor, which you may use to print labels and send personalized notes, memos, and form letters to your students. With ClikTab™ you can instantly log onto our website for updates and product information. Enter the information for a copy of music you wish to order, and the software will look up your music dealer, print an order, or log you onto the website to place your order. You may automatically assign uniforms, create new forms, reports, customize anything you want...There’s just not enough room here to list all of the features.

**Get a FREE Demo and take a “test drive of version 5.”** Go to our website to download, or call us and we’ll send you a CD-ROM with a full working version of our newest version.

**Using Brand X? Don’t despair! Competitive upgrades are available...and very affordable.**

PS: Got a Mac? We haven’t forgotten you...Version 5.0 is cross-platform.....just as cool...of course.
